# Company PROFILE

It is pleasure to inform you that **SHREE KUBER INDUSTRIES** has started its operations from MARCH 2024.

With over 15 years of experience in Roll manufacturing for different Industries **MAHENDRA CHOUDHRY** brings various rolls ranging Advanced Polyamide Calendering Roll, Cotton Rolls, Paper Rolls and nonwoven rolls for every Textile house, Paper Industries, Automobile, Steel Industries under one roof in newly setup state-of-the-Nart facility at SURAT.

The Support of our employees & trust of customers have resulted in continuous improvement in our quality with handsome reduction in cost, which assure fastest paybacks.

We request you to provide us with the opportunity to serve you and feel the difference.

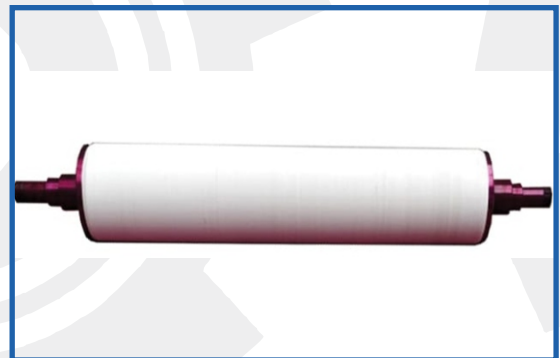

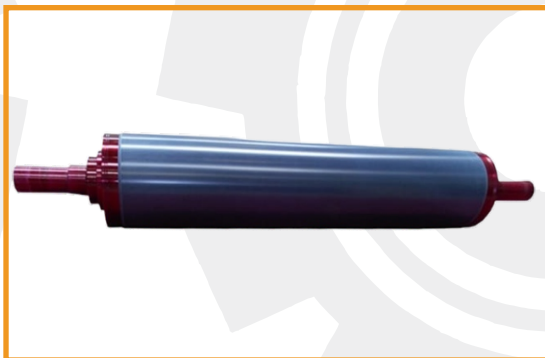

**An ISO 9001:2015  
Certified Company**

# Calender Bowl

We are the leading manufacturer, supplier and exporter of the industry, offering a wide assortment of Calender Bowl. Our products are widely demanded by the clients for their varied use. Our products are reckoned amongst the clients for their availability in different sizes.

## Range Of Calender Bowl

Cotton Bowl, Polyamide sleeve Bowl,  
Wool Paper Bowl, Chilled Bowl

# Calender Bowl

## Cotton Roll

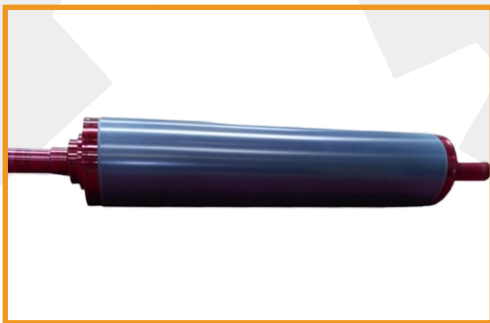

Cotton bowls or cotton rolls are the most traditional form of rollers that are still in use for Calendaring applications. The cotton bowl was firstly used in 80's and since then it is the first choice for every calendar. The reason for inclination towards cotton roll is the adaptability of cotton roll. The cotton roll produced by the Kuber are made from the finest fibers from the best processed cellulose which provides high resilience and strength. This makes the bowl resistant to marking and provides the uniform lusture.

## Polyamide Roll

Polyamide rolls are the modern form of Calendaring roll which are produced by mounting a casted polyamide cylinder on the solid steel shaft. Polyamide material is more resilient and tougher than cotton bowl and paper bowl and therefore it provides higher hardness, better nip and more speed. Similar to cotton bowl polyamide rolls are used on Textile calendars for calendaring which can be 3-bowl configuration or 5-bowl configuration.

## Paper Roll

Paper bowls are the improved form of Cotton bowls where the cotton material is filled in the form of paper sheets. These paper sheets are sourced from Europe and are made from fine cotton pulp and mixed with wool to provide the high degree of resilience. Paper rolls are more convenient to use as these rolls have wool content in them so they are more mark resistant. Unlike cotton rolls, they require lesser amount of conditioning and can be used within 4-6 hours of installation. They are widely used among Textile and paper industry and available in pure paper and wool blended material

## Steel Roll

Hi presser Chill Bowls Material Grade OCC 550 & E9 Matrrials Hardness 500-550, Drawing: To be provided by you. Machining: The rolls will be fully finished as per your drawings. The rolls will be dynamically balanced. Technology: The rolls will be made with Original German Technology. Hard Chrome, Diamond polish Mirror Finishing, Chrome 0.080 micron Hard Chrome Heating Capacity of Roll Material 750.Degree & Chrome

## 7 BOWL CALENDAR MACHINE

**This Calender Machine gives both side silky finish, smoothness, evenness, and luster on both sides.**

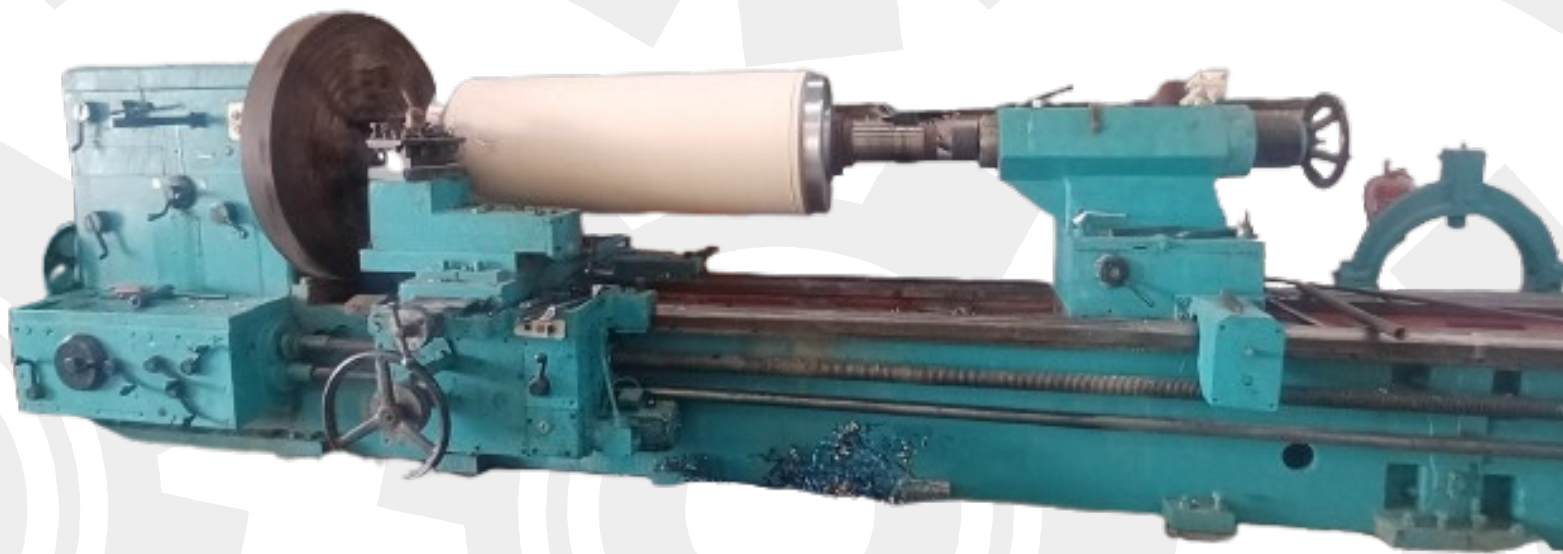

# Fabric Finishing Calendar Machines

**Complete Range Of Textile Fabric Finishing Calendar Machines  
Committed Brand With Precise Engineering Performance**

**We Are Manufacturers And Exporters Of 2 Bowl, 3 Bowl, 4 Bowl,  
5 Bowl & 7 Bowl Fabric Finishing Calendar Machines**

**German Technology With  
Indian Brain**
